## SUMMARY

2.5 years experienced Full Stack Developer highly skilled in software development, testing, documentation etc. across the complete development life cycle of a product. Adept at end to end software design & development including requirement gathering, documentation, infrastructure setup, coding & unit & integration testing. Effective in working independently and collaboratively in teams.

## KEY SKILLS

HTML/CSS

JavaScript

jQuery

MySQL

Nodejs

BOOTSTAP 4

Git

Unit Testing

## EDUCATION

National Institute of Engineering, Mysore, India

Jun '05 - Jun '09

B.E. Information Science

Visveshwaraiah Technological University

- Aggregate of 73.99%.

## PROFESSIONAL EXPERIENCE

Software Engineer

May '13 - Jun '14

Convergent Technology

Gurugram, India

Software Engineer

Aug '10 - Jan '12

Quest Informatics Pvt. Ltd

Bengaluru, India

### Project Profile

#### Adventure Companion

The Adventure Companion project is a dynamic and digital character sheet. The purpose of the project to remove all the hurdle player faces to fill the character sheet. Allow the player to easily access spell descriptions without having to thumb through a billion pages in the Player's Handbook. Allow the player to Keep track of class, level, background, weapons, ability scores and inventory. No more erasing your hit points over and over until there is a whole in your sheet.

Created With: **Visual Studio Code 1.51.1, jQuery 3.2.1, CSS-Materialize 1.0.0, Open5eAPI, RollDiceAPI**

GitHub Repository Path: [https://github.com/Bartok1945/adventure\\_companion](https://github.com/Bartok1945/adventure_companion)

GitHub Deployed Path: [https://bartok1945.github.io/adventure\\_companion/](https://bartok1945.github.io/adventure_companion/)

#### Weather Dashboard

The Weather-Dashboard project allow a user to see the weather outlook for multiple cities so that one can plan a trip accordingly. When user search for a city he gets the update for the current day and 5-day forecast. Whenever user load the page again, he will be presented with the last searched city.

Created With: **Visual Studio Code 1.51.1, jQuery 3.2.1, Bootstrap 3.4.1, Openweathermap API**

GitHub Repository Path: <https://github.com/panwaramita/Weather-Dashboard>

GitHub Deployed Path: <https://panwaramita.github.io/Weather-Dashboard/>

#### Code Quiz

The Code Quiz project, ask the user answer 10 question. For each correct answer user will get plus 5 and for each wrong answer user will get minus 5 and 10 seconds will be deducted from the timer. Once user answers all the question or the time is over then user has to enter its initials and submit. After submit user can view score history.

Created With: **Visual Studio Code 1.51.1, jQuery 3.2.1**
